Summary

I'm a full-stack web developer with 10 years of experience working across the MERN stack. I build scalable apps end-to-end — clean APIs, responsive UIs, and everything in between.

Currently, I'm a Senior Technical Specialist at DigitalAPICraft, focused on developing enterprise platforms using modern tech. I enjoy writing clean code, solving real-world problems, and staying up-to-date with the latest tools and practices.

Skills

- Javascript, Typescript
 - Reactjs, Reduxjs, Nextjs
 - Nodejs, Express
 - HTML
 - SQL, PostgreSQL
 - CSS, TailwindCSS, SCSS, Styled Component
 - Git
 - CI/CD, Github Actions
 - Docker
-

Experience

Senior Technical Specialist - DigitalAPICraft Private Limited March 2022 - PRESENT | Bangalore, India

- Developed and maintained React-based fintech dashboards within the Fiserv AppMarket ecosystem, enhancing user experience for enterprise banking partners.
- Built and optimized embedded API explorer tools that allow clients to visualize and test APIs in-browser.
- Collaborated with cross-functional teams to integrate API products into developer-friendly UIs, streamlining onboarding for partner banks and fintech users.
- Improved codebase maintainability and performance by implementing reusable component patterns, lazy loading, and state management best practices.
- Contributed to internal tooling for API documentation, reducing manual testing efforts and improving release cycles.

IT Application Developer - i-Link Research Solutions

July 2018 - March 2022 | Bangalore, India

- Analysed requirements and designed, developed, and implemented software applications for multiple websites.
- Enabled multilingual support and prepared existing web services framework for cross-market launches.
- Brought up additional features to in-house Administration Portal and Campaign Management System using PHP in MVC architecture and React JS for front end.
- Created REST API using Code-Igniter and MYSQL for mobile apps.
- Designed, implemented, and monitored web pages and sites for continuous improvement.
- Worked on product enhancements and bug fixes following Agile methodology, with Git version control.

Software Developer - Techno Exponent (T-Web Exponent Services Pvt. Ltd)

September 2017 - June 2018 | Kolkata, India

- Designed sites to be compatible with top browsers, including Firefox, Chrome, and Safari.
- Designed web interface for Portal for Merchants, from login flow to financial reports generation.
- Worked in a team of more than 5 members to create an e-commerce site, also used to fetch Amazon product listings for each individual seller, using Amazon Marketplace API.
- Converted mock-ups into HTML, JavaScript, AJAX and JSON.
- Represented a web team at meetings with executives and discussed project goals and milestones.

Program Analyst - Corelynx Inc

June 2015 - September 2017 | Kolkata, India

- Researched and developed new technology designs for the company's product CONVERGE HUB CRM.
- Implemented back-end API for Android and iOS apps.
- Created API documentation website using SWAGGER UI.
- Implemented drop-box style data storage functionality in ConvergeHub CRM and provided an option to sync its data to Dropbox, Google Drive, Box apps.
- Created Zapier App for CRM so that users can automate some of the basic but important functionality.
- Implemented campaign management system using Mail-chimp APIs.
- Developed code collaboratively with Agile squads to produce best results.
